Defining shared governance. The university council will operate under the principle of consultative decision-making whereby the opinion and advice of the university council membership are sought, but decision-making authority remains with the board of trustees and its appointed agent, the university president. Thus, the university council will function in a manner consistent with information sharing and discussion rather than joint decision-making. The university council provides open lines of communication and informs university administration on matters of planning, policy, and programs that are pertinent to the fulfillment planning,
